

Medical Assessment for Aviation

Instruction to Applicants

The application form for a medical certificate is available at Aeromedical Centres (AeMCs) and may also be downloaded from the Maldives Civil Aviation Authority (MCAA) website. Completed application forms must be submitted to the respective AeMCs or Aeromedical Examiners (AMEs).

Upon receipt of an application, the AME will review the submitted information and conduct all relevant medical examinations in accordance with the AeMC Standard Operating Procedures (SOP). If the results of the medical assessment are satisfactory, the AME may issue the medical certificate to the applicant.

If the outcome of the medical examination is unsuccessful, a medical certificate will not be issued. However, the medical examination report must still be submitted to the CAA. All such reports are forwarded to a Medical Assessor for further evaluation and verification. Following this review, the Medical Assessor's decision and accompanying assessment report are submitted to the MCAA.
